

The Rutland 503 Windcharger

A completely unique mini Windcharger designed with the weekend yachtsman in mind. The Rutland 503 is ideal for trickle charging batteries on board vessels less than 10m in length with battery banks of up to 100Ah. This latest model follows the success of its predecessor the Rutland 500 with a number of enhancements including performance and styling.

"Safety turbine" is a single injection moulding of 6 aerofoil blades protected by an outer ring.

Trickle charges in windspeeds as low as 5 Knots

Produces 25w in 19 Knots

Produces over 60w, nominally 5A @ 12V in 50 Knots

Stainless steel fasteners and marine grade materials

Turbine diameter of 510mm

Compact turning radius of just 225mm, great for when space is at a premium

Latest design improvements - the Rutland 503 is more reliable and efficient than ever!

No radiated interference - complies fully with BS EN5008-1 1992

Proudly manufactured in the UK

Part No: CA-05/02
