HIGHLIGHTS

- Uses record-breaking white Luxeon LEDs with light flux of 115 lumen per Watt
- Field tested for all-year operation
- Precision micro controller allows for smooth solar charging and accurate on/off switching
- All steel parts and LED lamp fitted to signpost with only two brackets
- Units are prewired and installed in minutes.
- Hinged service door with Yale locks for secure and easy maintenance
- Outstanding five year on-site warranty
- Made in the UK by SolarTech, an ISO9001:2000 registered firm.

FEATURES

- Made from galvanised steel and cast aluminium for high durability
- Complies with European Standard for Regulatory Road Signs EN12899-1:2001, see test report on website.
- Luminaire complies with BS 873 and IP54
- Uses highly efficient energy management system
- Colour coated to client's specifications
- Optimised for light levels and wind load on site
- Optional vandal protection

BENEFITS

- Large savings over life cycle versus mains-powered fluorescent signs
- Will enhance road safety anywhere in the UK at low cost
- Ready for immediate deployment and use
- No cabling, trenching, or environmental infringement
- No energy bills, immediate payback
- Complies with government directives on clean energy usage
